Projects

Tradetime

- Built a community-driven platform where skills are the currency, making professional growth accessible to everyone regardless of their budget.
- Focused on creating a frictionless "skill discovery" journey, ensuring users can find mentors or partners as easily as scrolling through a social feed.
- Designed a transparent "Ticks" system that builds trust between strangers, ensuring every exchange is fair, documented, and rewarding.

Smart Water Level Detection System

- Tackled the everyday stress of water management by automating the monitoring process for homeowners.
- Replaced manual, "guesswork" tank checks with a reliable sensor array that watches the water levels so the user doesn't have to.
- Developed a notification system that speaks "human"—sending helpful, timely alerts to a user's phone before a shortage becomes a crisis.

Awesometodos

- Replaced manual, "guesswork" tank checks with a reliable sensor array that watches the water levels so the user doesn't have to.
- Developed a notification system that speaks "human"—sending helpful, timely alerts to a user's phone before a shortage becomes a crisis.

Education

Western Institute of Technology

2024 - Present

Bachelor of Information Technology

Technical Skills

- **Design:** User Interface (UI) Design, Wireframing, Information Architecture, Prototyping, Logic Flowcharting, Visual Hierarchy.
- **Networking & Systems:** Cisco CLI, TCP/IP, VLAN Configuration, Network Topology Design.
- **Web Development:** JavaScript (Node.js), HTML5, CSS3, Express.js.
- **Design & Dev Tools:** Figma, Cisco Packet Tracer, Git/GitHub, VS Code.
